"In the third quarter of 2022, we achieved another quarter of steady growth in both net revenues and operating profits, thanks to our ability to increase enrollment in children's IT-focused STEAM education while streamlining our centers and headcount. Ultimately, this performance was mainly driven by the effectiveness of our relatively conservative growth strategy, whereby we focused on improving the quality of our courses and services and continued to optimize our operations to maintain financial health," remarked Ms. Ying Sun, the Chief Executive Officer of Tarena.

Ms. Sun continued, "Going forward, we anticipate more restrictions on the mobility of our students from the resurging COVID-19 and related prevention and control measures, which will affect our center operations, new enrollment and revenue to some degree in the fourth quarter. To ensure undisrupted services to our students, we will continue to optimize the quality of our OMO-based course delivery and service system. On the student acquisition front, we will continue to drive near-term enrollment in a cost-effective manner through referrals and renewal-based enrollment. Additionally, we will continue to improve operational efficiency to maintain healthy margins and operating cash flows."

"Furthermore, our Board of Directors approved another share repurchase program of up to US\$3 million, further demonstrating our confidence in the fundamental health and long-term development of the company as well as our commitment to enhancing shareholder value," concluded Ms. Ying Sun.

#### Net Revenues

Total net revenues increased by 4.6% to RMB643.3 million (US\$90.4 million) in the third quarter of 2022, from RMB615.2 million in the same period of 2021. #### Cost of Revenues

General and administrative expenses increased by 3.0% to RMB450.5 million (US\$63.3 million) in the first nine months of 2022, from RMB437.5 million in the same period of 2021. The increase was mainly due to a one-time provision for the residual amount of the anticipated settlement of a class action lawsuit net of the estimated insurance coverage in the first nine months of 2022. In addition, the increase in bonus payments resulted in an increase in payroll costs in the first nine months of 2022. # **Business Outlook**

Based on the Company's current estimates, total net revenues for the fourth quarter of 2022 are expected to be in the range of RMB560 million to RMB590 million, which represents a decrease of 10.0% to 15.0% compared to net revenues in the fourth quarter of 2021, after taking into consideration the likely continued impact of the COVID-19 pandemic.

#### **About Non-GAAP Financial Measures**

To supplement Tarena's consolidated financial results presented in accordance with United States Generally Accepted Accounting Principles ("GAAP"), Tarena's management uses non-GAAP measures of cost of revenues, operating expenses, operating income, net income, and basic and diluted net income per ADS, which are adjusted from results based on GAAP to exclude the share-based compensation expenses. These non-GAAP financial measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for, or superior to, GAAP results. In addition, calculation of the non-GAAP financial measures may be different from the calculation used by other companies, and therefore comparability may be limited.

Tarena's management believes that excluding the share-based compensation expenses provides meaningful supplemental information regarding our performance and liquidity by excluding certain items identified as non-recurring and infrequent in nature, and non-cash charges. The amount of share-based compensation expenses is not built into the Company's annual budgets and quarterly forecasts, which generally will be the basis for information Tarena provides to analysts and investors as guidance for future operating performance.

The non-GAAP financial measures are provided to enhance investors' overall understanding of Tarena's current financial performance and prospects for the future. A limitation of using non-GAAP cost of revenues, operating expenses, operating income (loss) and net income (loss), excluding the share-based compensation expenses is that the share-based compensation charge has been and will continue to be a recurring

expense in the Company's business for the foreseeable future. In order to mitigate the limitation, the Company has provided specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables include details on the reconciliation between GAAP financial measures that are most directly comparable to the non-GAAP financial measures the Company has presented.

### Notes:

- (a) There was no tax impact of share-based compensation expenses for the third quarter of 2022 and 2021, respectively.
- (b) The Non-GAAP net income/(loss) per ADS is computed using Non-GAAP net income/(loss) attributable to ordinary shareholders and the same number of ordinary shares are used in GAAP basic and diluted net income/(loss) per ADS calculation.
- (c) Each ADS represents five Class A ordinary shares. The weighted average number of ADS and earnings per ADS have been retrospectively adjusted to reflect the ADS ratio change from one ADS representing one Class A ordinary share to one ADS representing five Class A ordinary shares, which became effective on December 23, 2021.
